

The Big Question?

What do I teach, what do I leave out?

For those using the Edvantage Science AP Chemistry 1 and 2 program, lead author Cheri Smith provides the following suggestions.

- Leave out the last bits of 5.3
- May also leave out Chapter 9, though 9.1 and 9.2 are worth considering.

- Leave out Chapter 3 as section 2.4 will qualitatively deal with H and S.
- Omit Chapter 5, but keep 5.1
- Omit Chapter 6
- Omit Chapter 7, but keep 7.1
